PROFESSIONAL SUMMARY

Backend Developer with 3.5+ years of experience building Laravel backends and REST APIs. Responsible for the complete backend of Waslany and Baraddy, and a contributor to RDAPP Client and Inspectors for building and facility insurance workflows in Saudi Arabia. Experience includes backend team leadership, payment integrations, and real-time application features.

CORE SKILLS

Backend: PHP, Laravel, REST APIs, MySQL, SQLite, OOP, SOLID, Design Patterns, MVC

Integrations: Firebase Auth, Firestore, Paymob, PayPal, Stripe, OneSignal, Twilio, WAAPI

Tools & systems: Git, GitHub, Postman, Apidog, Linux, shared hosting, VPS hosting

Additional: JavaScript, HTML, CSS, C++, jQuery, Bootstrap, Ajax

Currently learning: Docker, CI/CD, AWS S3

PROFESSIONAL EXPERIENCE

Dom App Hub | Backend Developer

Sep 2025 – Present | Kafr El-Sheikh, Egypt | Hybrid

- Develop Laravel backend systems and REST APIs for the Saudi Arabia branch, supporting software solutions in the architectural field.
- Integrate third-party services and optimize SQL queries to support application workflows.

TopBusiness | Backend Developer

Aug 2023 – Sep 2025 | Shebin El-Kom, Menoufia, Egypt | On-site

- Managed the backend team and worked on 15+ applications, including government projects.
- Built APIs and e-commerce features using Laravel, MySQL, and Firebase; integrated Paymob, PayPal, Stripe, and OTP services.

Octopus Team | Co-Founder & CTO

Sep 2023 – Present | Egypt | Remote

- Lead backend development for cross-platform applications; delivered 12+ production applications with the team.
- Design REST APIs, authentication systems, and application business logic using Laravel.

Tarawud | Backend Developer

Jan 2023 – Aug 2023 | Bani Suef, Egypt | Hybrid

- Built backend solutions and APIs for educational platforms, e-commerce stores, and car spare parts management systems.

SELECTED PROJECTS

Waslmy | In-compound ride-sharing | 500+ active users

Role: Complete backend development | Backend stack: Laravel, Firebase, MySQL

- Developed the entire backend for ride booking, real-time location tracking, and pricing workflows.

[Google Play](#) | [Website](#)

Baraddy | Refrigerated transport | 5,000+ active users

Role: Complete backend development | Backend stack: Laravel, Firebase, MySQL

- Developed the entire backend of a B2B logistics platform connecting exporters with refrigerated trucks.
- Implemented live order tracking, digital contracting, and multiple payment integrations.

[Google Play](#) | [Website](#)

RDAPP Client & Inspectors | Building and facility insurance

Role: Backend contributor across both apps | Backend stack: Laravel, Firebase, MySQL

- Contributed to backend development for insurance companies and inspection engineers in Saudi Arabia, supporting 1,000+ active clients.
- Developed reporting modules covering RD0, Inspection Report, RD1, RD2, DR, RD3, RD5, RD6, and RD7 as part of broader backend responsibilities.

[Client: Google Play](#) | [Client: App Store](#) | [Inspectors: Google Play](#)

Mydany | Hajj management

Backend stack: Laravel, Firebase, Firestore

- Developed backend features for a platform serving the Saudi General Transport Center, with pilgrim and leader apps, admin tools, and a map dashboard.
- Implemented Firestore location tracking, daily reports, complaints, and live communication features.

Additional projects

TopBusiness HR (attendance and payroll), Hero (ride-hailing), AdPay (e-commerce), Mawhebtac, Travel Club, Lotel, Car Plates Auction, and Ajjel.

EDUCATION

B.Sc. in Computer Science | Menoufia University

Sep 2020 – Jun 2024 | Faculty of Computers and Information | IT Department

Graduation project: Educational Facilities Management System. Role: Team Leader.
