## ABOUT ME

Backend Developer with over 2.5 years of professional experience in designing and building scalable backend architectures for real-world platforms using Laravel. Skilled in system architecture, API development, and third-party integrations (Firebase, payment gateways, OTP, etc.). Passionate about building solutions that solve real business problems with high performance and maintainability.

## EDUCATION

### Faculty of Computers and Information, Menoufia University

B.Sc. in Computer Science

Sep. 2020–May 2024

Shebeen El-Kom, Menoufia, Egypt

## EXPERIENCE

### DomApp

Backend Developer

Sep. 2025 – Present

Baltim, Kafr El-Sheikh (Headquarters in Saudi Arabia)

- Building and maintaining scalable business applications using Laravel and RESTful APIs.
- Designing modular backend architectures to enhance performance and maintainability.
- Integrating third-party services, optimizing queries, and improving application reliability.
- Collaborating closely with cross-functional teams to deliver seamless end-to-end solutions.

### TOP BUSINESS Company

Backend Developer

Aug. 2023 – Aug. 2025

Shebin El-Kom, Menoufia

- Developed APIs and e-commerce features for widely used applications.
- Utilized Firebase services for hosting, authentication, and notifications.
- Integrated OTP (Twilio, Firebase) and payment gateways (Paymob, PayPal, Stripe).

### Freelance

Backend Developer

feb. 2023 – Aug. 2023

Remote

- Built custom backend systems and APIs for individual clients.
- Worked with Laravel and MySQL to deliver scalable, secure solutions.
- Communicated directly with clients to gather requirements and deliver results.

## PROJECTS

### Travel Platform | Flutter, Laravel, Firebase, MySQL

- Built a mobile app and dashboard system for booking hotels, transport, restaurants, and tours.
- Enabled vendors to manage listings, availability, and online payments.
- Implemented a bus reservation module with route, vehicle, and seat management.
- Integrated real-time notifications, OTP, and social login (Google, Apple).
- **Live:** Visit Admin Panel

### Lotel Platform | Flutter, Laravel, Firebase, MySQL

- Developed hotel booking system with mobile app, vendor dashboard, and public site.
- Allowed vendors to add properties, rooms, pricing, and manage reservations.
- Implemented admin approval, featured listings, and secure online payments.
- **Live:** Visit Lotel

### Hajj Management System | Flutter, Laravel, Firebase, Firestore

- Built a Hajj management platform with apps for pilgrims and leaders, plus admin and map dashboards.
- Pilgrim app: check-in/out, daily reports, complaints, live chat, and voice calls.
- Leader app: review reports, guide teams, escalate issues.
- Map dashboard: live location tracking via Firestore.
- **Admin:** Visit Admin Panel    **Map:** Visit Map Dashboard

## OTHER PROJECTS

---

### **Top HR System** | *Laravel, MySQL*

- Employee management with apps for users, HR, and admin dashboard.
- **Live:** Visit Dashboard

### **Agel Installment System** | *Laravel*

- Deferred payment system with admin and partner dashboards.
- **Admin:** Visit Admin Panel    **Partner:** Visit Partner Panel

### **Multi Services Platform** | *Flutter, Laravel, Firebase*

- Multi-role system where users post services, providers apply, and supervisors approve via dashboard or mobile app.
- Includes admin dashboard, role-based access, and integrated real-time live chat.
- **Live:** Visit Dashboard

### **AdPay E-commerce App** | *Laravel, Flutter, Payment Gateways*

- Developed a full e-commerce platform with over 3000 products, integrating secure APIs, Flutter mobile app, and multiple payment gateways.
- Implemented analytics tools and collaborated on marketing to boost user adoption and retention.
- **Live:** Visit Dashboard

### **Hero Ride-Hailing App** | *Laravel, Flutter, Firebase*

- Built a two-sided ride-hailing app enabling clients to request trips and drivers to accept/manage them in real-time.
- Integrated notifications, trip tracking, and smart driver assignment features.
- **Live:** Visit Dashboard

## TECHNICAL SKILLS

---

- **Programming Languages:** PHP,C++, JavaScript, HTML, CSS
- **Databases:** MySQL
- **Backend Frameworks:** Laravel
- **Web Technologies:** REST APIs, jQuery, Bootstrap, Ajax
- **Development Concepts:** OOP, SOLID principles
- **Tools:** Postman, API testing tools (e.g. Apidog), Git, GitHub, PhpStorm, VS Code
- **Services:** Firebase, OneSignal, OTP
- **Operating Systems:** Daily usage of Linux-based distributions (Linux Mint, Zorin OS)
